Prior to partnering with Jonas Premier, Gillam Group was using QuickBooks to handle their construction software needs. While QuickBooks was able to perform basic accounting functions, it lacked in many of the construction-specific areas Gillam Group required. As Aziz Allana, Director of Finance & Accounting at Gillam Group stated, “With QuickBooks, we performed a lot of double entries, which were quite time consuming, because QuickBooks was unable to provide reporting for project management. Therefore, we had to use Microsoft Excel, which could not provide us with the real-time information we needed.” Having information spread out across multiple software programs really posed a challenge for Gillam Group, which was one of the main reasons why they ultimately decided to go with Jonas Premier, a fully integrated and automated software solution.

With Jonas Premier now up and running, Gillam Group has seen numerous improvements across the business. As Aziz Allana stated, “With Premier's integrated system, Gillam has been able to track Estimate at Completions (EAC's) 20% more accurately by having current costs available to its project Mangers when forecasting each cost code. This has led to more consistent reporting month to month. As well, having purchase orders, sub-trade contract information and change orders entered in Jonas by site managers, the paper trail between site and the accounting department has been all but eliminated, with all Accounts Payable substantiation at the accountant's finger tips.” The fact that Premier is fully integrated allows Gillam Group greater infrastructure and keeps all of their information within one unified software solution, as opposed to spread out across numerous software, which can lead to data inconsistencies and errors. They are also able to search for and access information and documents much quicker, having all data stored in one location. With regards to job costing, Gillam Group is able to create more detailed and meaningful job cost reports that accurately reflect the current state of the business.
Gillam Group has been able to achieve incredible gains since partnering with Jonas Premier Construction Software. Not only have they roughly doubled their revenue since implementing Jonas Premier, they have done so by only increasing their back office staff by 30%. Making the switch from QuickBooks means they can run more detailed, accurate, and easy to read job cost reports. Gillam Group is also working with numbers in real-time, allowing them to make more informed decisions regarding the business. Having all of their information securely stored in the cloud gives them greater accessibility, with the peace of mind knowing their data is safe. With Jonas Premier, Gillam Group knows they have a fully integrated cloud construction software solution that meets their needs today, as well as into the future as they continue to grow.

Jonas Premier is a fully integrated, cloud-based construction accounting software solution ideal for General Contracting businesses. Running in the cloud, it provides you with the ability to access and input key business information anytime, anywhere. It is built on modern software architecture, fully flexible and is simple to use. The complete offering for contractors includes: Accounting, Job Cost, Subcontract Management, Billing, Progress Billing, T&M Billing, Financials, Project Management, Bank Management, Purchase Order, Inventory, Time Entry, Integrated Document Storage, Field Mobile Apps, and Vendor and Customer Portals.
